EMPOWER®
WORKSPACES

YOUR WORK, YOUR WAY.

Empower® has evolved. Today's amenities-driven workplaces have begun to shed the outdated concept of "cubicle row"—one-size-fits-all workstations that don't consider the unique needs of individuals. Empower—a comprehensive and versatile solution that fosters productivity and collaboration—has undergone a remarkable transformation. Designed to surpass the confines of a simple benching system or standard workspace, these command centrals transcend conventional parameters with enhanced depth, dimension, and dynamic performance.

Shown with Cliq™, Ignition® 2.0, and Astir™ seating.

DESIGNED FOR HUMAN CONNECTION

Empower can be configured as a private space for focused work or an open and transparent collaborative hub. By acknowledging the importance of the human element, Empower fosters well-being, comfort, and communication—ultimately enhancing productivity.

DOWN TO THE WIRE

Whether you're collaborating with the team or focused on heads-down work, convenient access to power and data is non-negotiable. Empower's sleek trough operates as thoroughfare for cables and cords, ensuring efficient digital capabilities and a clutter-free workspace. Simply plug power modules into the duplex located within the trough and attach them to your worksurface for instant connection and productivity.

PRACTICALITY WITH PANACHE

By integrating sleek and minimalistic gallery panels, essential height-adjustable desking, and collaborative worksurfaces with designer angled legs, Empower offers an elegant and aesthetically pleasing design while still serving the functional needs of a workspace.

DESIGNER-ANGLED LEGS
Available in a variety of paint colors, designer-angled legs celebrate your personality and add a contemporary finish to your workstation.

UNIVERSAL SCREENS
Available for both fixed and height-adjustable applications, universal screens add privacy without sacrificing style.

SINGLE-SIDED BENCHING
With the ability to place workstations against walls or windows, height-adjustable single-sided benching helps you make the most of valuable space real estate.

COLLABORATIVE STATIONS
Add a smaller touchdown station or a larger collaborative table for efficient and effective teamwork.

END OF RUN MODESTY INFILLS
Available in both laminate and metal finishes, end of run modesty infills define spaces and offer a streamlined and sophisticated aesthetic.

END & MID-RUN GALLERY PANELS
Designed to foster privacy and encourage heads-down focus, end and mid-run gallery panels are the modern office's answer to stylish discretion.

Shown with Ignition® 2.0 seating and Fuse™ storage.

TAKE IT UP A NOTCH

Shown with Cliq™ seating and Fuse™ storage.

Who says you can't do it all? Empower's height-adjustable bases take benching to the next level. Sit tight for heads-down focus or stand tall to collaborate with your co-workers—the choice is yours. Plus, with tidy wire management that routes power below the worksurface—regardless of height—anyone can amp up their organization and surface real estate.

Shown with Cliq™ seating and Fuse™ storage.
